Activities and Projects

Remedify (Node.js/Express)   RamHacks Hackathon
Developer   *September 2018 – October 2018*
- Remedify is a REST API that provides natural remedy solutions for common illnesses.
- Data was acquired through a python web crawler made with the Beautiful Soup library and was accompanied by an iOS app to display the implementation of the API on a sample project.

Cipher Texts (Python)   Independent Project
Developer   *March 2018 – Present*
- Cipher Texts is a program that receives the user's desired encoded text and encrypts their information with the choice of a Vigenere, Caesar, or Rail Cipher.

X-Spend (Swift)   HackUVA Hackathon
iOS Mobile Developer   *March 2018 – April 2018*
- X-Spend is a financial app created to keep track of expenses while sharing spending habits with both the user and friends or family members.

MyMenu (Java)   Independent Project
Developer   *September 2018 - Present*
- Developed a user-friendly and customizable restaurant menu that offers dishes which fall under a certain category of food. The menu can feasibly store as many dishes at the user's disposal.
